

The Community Climate Conversations are a chance for South Australians to have a say in how we work together to achieve net zero greenhouse gas emissions by 2050. A report on your ideas will be provided to the South Australian Government to assist in planning to achieve a net zero emissions future.

Hosting a Community Climate Conversation is super easy – its just 3 simple steps

1. ORGANISE

Use an existing meeting or organise a catch up with friends, family, colleagues, or a community group and send them the Conversation Guide to kick start your chat.

<https://shorturl.at/bBEM5>

2. DISCUSS

Chat through the questions in the online form:

<https://www.surveymonkey.com/r/ClimateConvoSA>

You don't have to answer them in order and you don't have to answer them all.

3. SUBMIT

Tell us what your group thinks - review your notes, hit submit and you are done!
